DEXTER DX800C

CAR-MOUNTED SCISSOR LIFT

# NEW DX800C car-mounted scissor lift

We have developed a completely new multipurpose scissor lift. It is also possible to install the DX800 on a vehicle chassis. For example, a good-sized platform can be built on the VW Crafter's platform in addition to this.

The lift is equipped with sturdy support legs, which help the vehicle to be straightened on an inclined surface. The use of support legs also removes the flexibility of the platform, making the use of the lift more pleasant.

The scissor lift is easy and quick to use, you just drive the lift to the work site and you are ready to work. The movable work surface expands the working area and enables working over small obstacles.

It is possible to get the DX800C mounted on various vehicle platforms. You can choose direct electric drive, battery version or a combination of these as the power source of the lift. If necessary, the vehicle can also be equipped with a separate aggregate.

# DX800C

The DX800C opens up new possibilities for the use of scissor lifts. Thanks to the DX800C, the personal lift is always with you, and even small personal lifts can be carried out safely. The DX800C can be customized according to the purpose of use for different vehicle platforms.

## MAX WORKING HEIGHT

7,50 m + chassis

## MAX PLATFORM HEIGHT

5,50 m + chassis

## OUTREACH

0,85 m on both sides

## WORKING WIDTH

2,26 m

## MAX LOAD

215 kg

## PLATFORM SIZE (l x w x h)

2,20 m x 1,00 m x 1,10 m

## PLATFORM CONTROL

electric control

## MACHINE LENGTH

According to the chassis

## MACHINE WIDTH

2,26 m

## MACHINE HEIGHT

1,74 m + chassis

## MACHINE WEIGHT

ca. 950 kg + chassis

## STANDARD POWER SOURCE

230 V / 50 Hz / 1,9 kW
